REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to the following:

12. (original) A method, comprising:

- applying a bottom anti-reflective coating comprising a polymer and a plurality of refractive polymer beads;
- applying a photoresist above the anti-reflective coating;
- patterning the photoresist;
- etching the substrate to form a first opening;
- applying a sacrificial anti-reflective coating comprising a spin-on-polymer and a plurality of refractive polymer beads over the substrate and the first opening such that the first opening is filled with the sacrificial anti-reflective coating;
- applying a photoresist over the sacrificial anti-reflective coating;
- patterning the photoresist;
- etching the substrate and the sacrificial anti-reflective material over the first opening to form a second opening; and
- filling the first opening and the second opening with a metal.

Applicants have canceled the rejected claims 25-30 and the only claims remaining are claims 12-14 which were previously indicated to be allowable over the prior art of record. Those claims are drawn to a method wherein a sacrificial anti-reflective coating comprising spin-on polymer and a plurality of refractive polymer beads is used in the process for forming a patterned image. None of the prior art references of record disclose the recited process comprising said sacrificial layer as recited.

Accordingly, claims 12-14 are seen as allowable and passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
